Patient	Margaret ASHWORTH
Hospital no.	W0882213
NHS no.	999 447 1015
Date of birth	14/03/1969
Clinic	Colorectal Surgery - Mr D Achebe
Seen	12/09/2024

Typed 13/09/2024

DIAGNOSIS

1. Adenocarcinoma of the sigmoid colon (biopsy confirmed)
2. Iron deficiency anaemia

OUTCOME

Staging CT arranged. For discussion at colorectal MDT 19/09/2024.

PLAN

- CT chest, abdomen and pelvis
- Pre-operative assessment
- Clinical nurse specialist contact given

INVESTIGATIONS

Colonoscopy 02/09/2024: see separate report. Circumferential tumour at 30 cm, biopsies taken.

CLINICAL SUMMARY

Dear Dr Patel,

I saw Mrs Ashworth today following her colonoscopy on 02/09/2024, which showed a tumour in the sigmoid colon. Histology has confirmed adenocarcinoma. I explained the findings with her husband present.

She reports a change in bowel habit since around February this year and tiredness. We will proceed with staging and discuss at MDT.

Kind regards,

Mr D Achebe
